Project Brief

Herbal is an online marketplace that sells nutritional supplements, some alternatives to medicines made from natural materials, and some products that help in losing weight in a safe way.

The website is built and implemented as a branded app using the following components:

1. Home page that includes:

- Navbar which has a logo and some icons. It allows you to navigate to the rest of the website's pages.
- Slider of images. It highlights the type of products on the ecommerce website and its purpose.
- Categories.
- Featured Products.
- Hot Products.
- Footer.

2. Category page includes:

Some Categories that organize products to facilitate the search process for the user.

3. Vendors Page:

Name of vendors who have products.

4. Product view page:

Show product image, price, and simple description.

5. Profile Page:

The information of the person who logged into the site to complete the purchase process, in addition to his order.

6. Admin Dashboard

In this section, admin users can add,delete,and edit for products, category, vendors, and customers.

List of programming languages and framework
