

Herbal

Herbal is an online marketplace that sells nutritional supplements,

some alternatives to medicines made from natural materials, and some products that help in losing weight in a safe way.

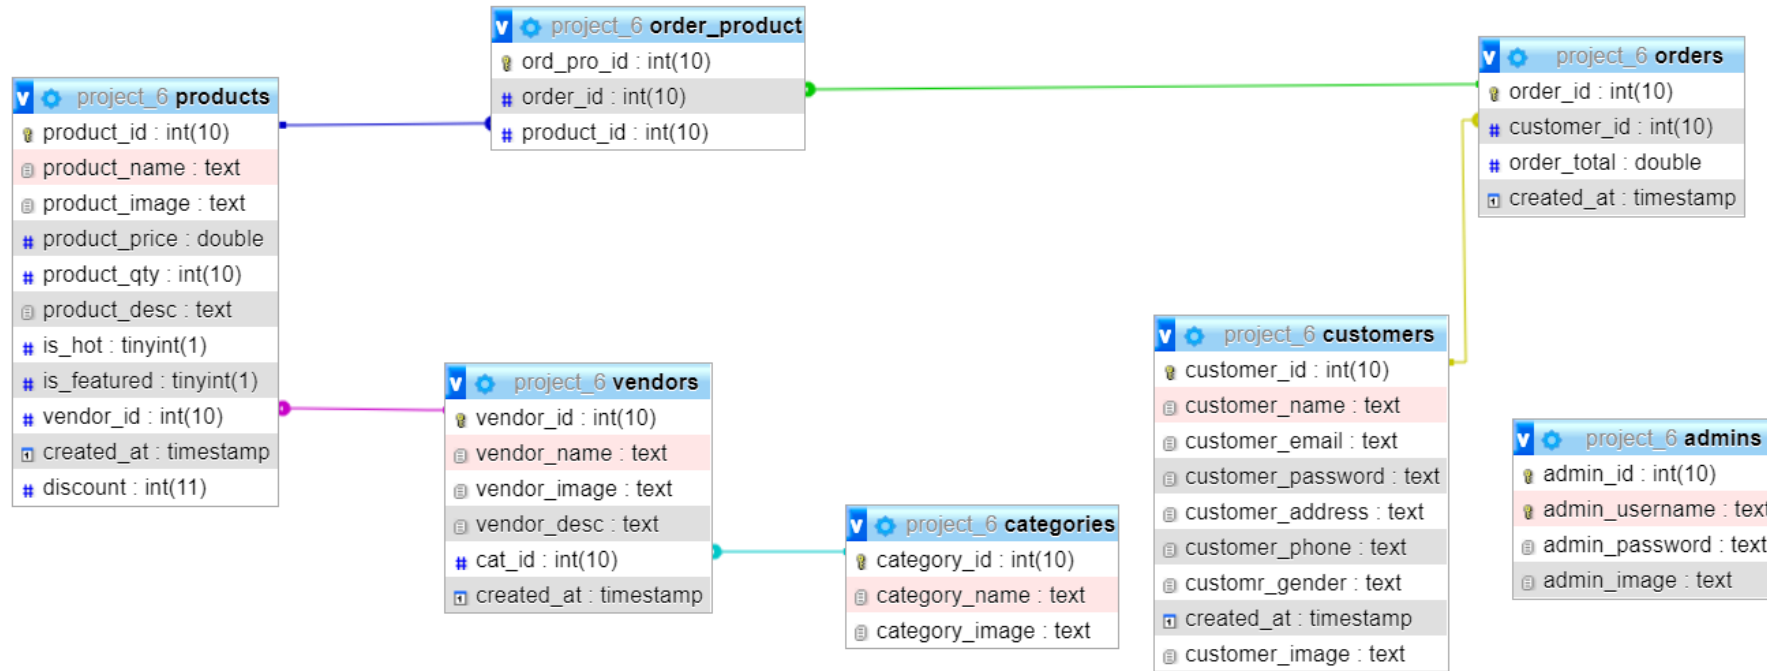

# Our vision

To allow all food  
supplement shops  
sell their products  
through the online  
marketplace

Herbal

# Database Diagram

# security

user can make registration in the website and login any time with the same information that was registered in it

And no person can log in to another person's account or view the order that he requested.

# Test process

I checked the website by registering and login , and adding more than one product to the card then calculate total of price.

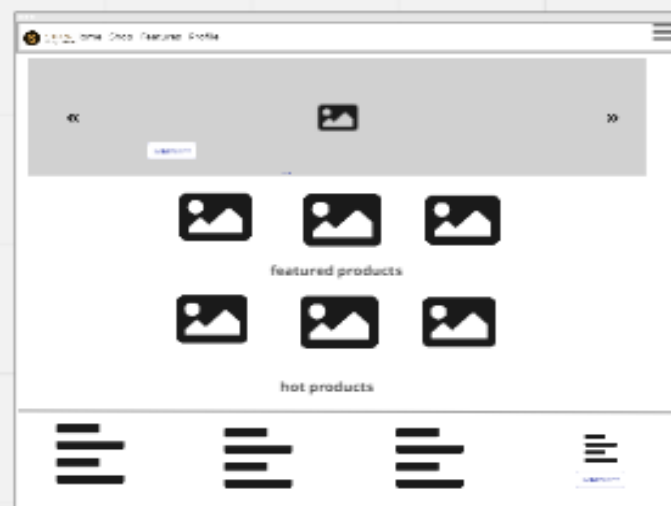

# Summary

In this site, many programming languages were used to make it more dynamic, and for you there were some challenges such as making it compatible with all mobile screens in addition to table relationships in the data base and applying that through the code.
